

The given plans illustrate the changes which will be happen on the site of airport after redevelopment next year and how it is look now.

Overall, the site of an airport will experience several changes and developments in next year.

Based on plans, there is a café in the right corner and the check-in in the left corner of the security passport control room which will be changed in terms of the location in the next years also, a bag drop will be introduced in the left corner of security passport control. By the next year, an ATM, café, and car hire will have been built in the passport control customer room which are not available now.

According to the plans, one significant5 change is the number of gates which are` 8 now but it will be increased to 18 in the next year. As well as this, the walking will be converted to the sky train and shop will be constructed in the next year.
