

The maps illustrate the developments which will take place in the southwest airport in the next year.

Overall, what stands out from maps is that, a complete transformation will be happened special in the expanding the gates and add some facilities such as bag drop, ATM and car hire.

It is obvious that, the location of departures and arrivals are remain but it is supposed to place additional doors. As regards to departure section, there are merely a check-in and café, however it is going to install a bag drop instead of check-in and check-in move to opposite side of the hall and café also will be located next to the bag drop in the vicinity of one of departures door. If we look at arrivals section in the future, which is empty currently, there will be an expanding in the bottom of the hall in order to establish a car hire. In addition, a café and ATM will be placed in the right side of section as well.

Security, passport control and customers will be unchanged. However it will be definitely built some shops upon the existing the security section or departure. A significant change will be happened in the access way to the gates. A walk way is going to demolish to make way for sky train. Furthermore, the number of gates plan to be doubled. (8 at the moment and 18 after renovations)
