

The maps depict the current situation of an airport and the developments which will be happened next year.

Overall, the airport will undergo dramatic changes as some locations are going to be relocated, a few stores and facilities will be set up.

On the departure side, in the east, there is a café which will be moved to the southwest of this sector. In addition, where the check-in stands to the west of the café, there will be a bag drop, and the check-in is going to be in the northeast of the departure part. Moreover, some new shops are projected to be constructed in the northwest of this part. Finally, the number of doors of this part will be expanded.

With regard to the arrival section, a new café will be opened. Furthermore, to the south of the café, an ATM and a car hire store are going to be situated. In addition, the number of doors of this part will increase.

Eventually, the number of gates located in the north of the airport will rise from 8 to 18 in the next year. Moreover, the walkway allocated to departed passengers will be converted into a sky train for all passengers.
